Women

DPMG Clinical Research is a trusted leader in the medical research community, with a network of **seven clinics** dedicated to advancing science and patient care. Our strategically located sites provide access to a diverse patient population, further supported by our **Street Medicine Program**, which engages underserved communities to expand access and enhance recruitment. We are committed to conducting ethical, high-quality studies that drive medical progress and shape a healthier future for all.

With access to **30,000 patients**, we set a new benchmark in delivering exceptional results and accelerating study enrolment beyond expectations.

Palm Springs' rich demographic diversity is reflected in our patient pool. Approximately **45%** of our participants are of Latin heritage, **65%** are women and **95%** have never participated in clinical trials. We proudly serve a wide range of age groups, genders, and racial backgrounds, ensuring inclusive representation in our studies.

Internal medicine

Cardiology

Family medicine

Psychiatry

We are actively recruiting participants for ongoing research studies in both **metabolic health** (Diabetes, Hyperlipidemia, Hypercholesterolemia and Obesity) and **mental health** conditions (Depression, Anxiety, **substance abuse**-related conditions). We are also interested in trials in COVID, Asthma, RSV, Flu, Vaccines, Hypertension and CHF.

We have several MDs working with us from various disciplines: **Cardiology, Family Medicine, Internal medicine, Pulmonology, and Psychiatry**. Our Clinical Research site is adjacent to Desert Regional Network which consists of three hospitals and operates as Level 1 Trauma Center. Our research facility has state-of-the-art equipment including echocardiography, and spirometers. All equipment is calibrated regularly and monitored 24-7. We also have access to cutting-edge diagnostic equipment in the adjacent hospital.

Research Infrastructure Includes:

- CLIA-waived laboratory capabilities
- Freezers for sample storage (-20°C and -70°C)
- Study-designated refrigerator for drug and supply storage
- Dedicated conference and monitor areas
- Secure research storage room
- Designated areas for physical exams, EKGs, and phlebotomy
- Site-owned EKG machine
- Double-locked, temperature-controlled drug storage room
- Consultation rooms for consenting and study assessments
- Centrifuge for sample processing
- Automated External Defibrillator (AED)
- Digital weight scales and stadiometer
- Automatic and manual blood pressure monitors
- Digital thermometers
- Binocular compound microscope (40x - 2000x magnification)

Additional Amenities:

- Comfortable waiting area with a private entrance for research participants and study staff
- Spacious monitoring area with access to wireless internet, copier, and telephone services
- Dedicated kids' area to accommodate participants' children or siblings
